Columbia Clock Wall Project Moving Quickly

The Columbia Community Foundation's Clock Wall Project on the northwest corner of Royalton Road and Route 252 is moving quickly.

The cement footer has been poured, the Foundation stones have been delivered to the site and the actual stacking of the wall will take place by Monday August 19th. The stones should be mortared together by the end of the month and the custom LED lighting should be installed by then as well.

The actual clock face and the lettering should be placed on the stones by the third week in September.

Several companies and individuals have stepped up with either monetary donations or in-kind donations of materials or services.

Westview Concrete has provided the cement for the footer, Ray Anthony helped with the construction of the footer and Bobby Rundle has coordinated the delivery of the stones. Jay Schwartz of the Ohio Valley Group and Charlie McKinley of West Construction are providing the masonry work.

The Columbia Community Foundation is soliciting monetary and material donations for the balance of the project. Materials needed include washed river gravel, top soil, straw, and grass seed.

To offer material or services, please contact Wayne Brassell at 236-8293 or to make a monetary donation, please call the Foundation at 236-8000 or visit our website.

The Columbia Community Foundation is a registered 501(c)(3) non-profit public charity committed to providing funding for scholarships, and good works in the community. For information on the organization, please call the Columbia Community Foundation at 440-236-8000 or visit the group's website at www.columbiacommunityfoundation.org.

Wayne Brassell (left) and Ray Anthony work on preparing the footer for the new Columbia Clock Wall being constructed by the Columbia Community Foundation.
